

Appl. No. 10/086,340
Amndt. dated September 26, 2003
Reply to Office Action of June 26, 2003

Listing of Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended): A display support for releasably and rigidly holding a flat display comprising:

- B1
- (a) a base frame member;
 - (b) first and second side frame members extending upwardly from opposing ends of said base frame member, said side frame members and said base frame member each having a substantially "U" shaped channel formed therein, said channel in said first side frame member facing said channel in said second side frame member and said channel in said base frame member facing upwardly to form a continuous channel whereby said display slides into and is supported by said channel defined by said frame members; and
 - (c) support means for mounting supporting said frame members on a supporting structure and attaching to a towing hitch on a vehicle, said support means comprising:
 - (i) a first support member having first and second ends, said first end having attachment means for releasable attachment to the towing hitch on the vehicle, and
 - (ii) a second support member connected to the second end of said first support member and extending substantially perpendicularly therefrom, said base frame member attached to said second support member whereby said display is positioned above said towing hitch.

Claim 2 (original): A display support according to claim 1, wherein said flat display is a sign.

Claim 3 (currently amended): A display support according to claim 1, wherein said support means comprises ~~at least one horizontal~~ a first bracket having opposing ends connected to said first and second side frame members for mounting said frame members to said ~~supporting structure~~ second support member.

B1
Claim 4 (currently amended): A display support according to claim 3 wherein said first bracket includes apertures therein for mounting said frame members to ~~a supporting structure~~ said second support member.

Claim 5 (currently amended): A display support according to claim 3, further comprising at least one adjustable stabilizing member for attaching to said first bracket and said second support member whereby attached to said bracket for mounting said frame members are stabilized to said supporting structure on said second support member.

Claim 6 (original): A display support according to claim 1, further comprising at least one horizontal bracket having opposing ends connected to said first and second side frame members and having apertures therein for attaching accessories such as lights and license plates.

Claim 7 (currently amended): A display support according to claim 1, wherein said first support member is positioned horizontally, and said second support member is positioned vertically, supporting structure is an automobile and said support means comprises:

- B1
- (a) ~~a horizontal support member having first and second ends, said first end having attachment means for releasable attachment to a towing hitch on an automobile; and~~
 - (b) ~~a vertical support member connected to the second end of said horizontal support member and extending upwardly therefrom, said base frame member attached to said vertical support member whereby said display is positioned above said towing hitch.~~

Claim 8 (currently amended): A display support according to claim ~~[[7]]~~ 3, further comprising at least one horizontal wherein said support means comprises a second bracket having opposing ends connected to said first and second side frame members proximate top ends of said first and second side frame members, said bracket attached to said vertical support member for stabilizing said frame members and further comprising at least one adjustable stabilizing member for attaching to said second bracket and said second support member whereby said frame members are stabilized on said second support member.

(Claim 9 (canceled).

Claims 10-13 (withdrawn).

Claim 14 (canceled).

Claim 15 (original): A display support for holding a flat display comprising:

- B1
- (a) a single sheet of material having a plurality of apertures formed therein;
 - (b) said apertures adapted for permitting said flat display to be attached to said sheet of material by fasteners extending through said flat display and said apertures;
 - (c) a horizontal support member having first and second ends, said first end having attachment means for releasable attachment to a towing hitch on an automobile; and
 - (d) a vertical support member connected to the second end of said horizontal support member and extending upwardly therefrom, said sheet of material mounted on said vertical support member by a fastener extending through at least one of said apertures whereby said display is positioned above said towing hitch.

Claim 16 (withdrawn).

Claim 17 (currently amended): A display support for holding a flat display according to claims claim 14 or 15, wherein said apertures comprise four horizontally oriented rectangular apertures, each of said apertures positioned proximate a corner of said sheet and for receiving a strap extending vertically from said sheet of material.
